

Lets Eradicate The Hitman Culture in our communities and broader South African Society

***#Asiqede umkhuba omubi emiphakathini yethu yokubulalana,
Aziqedwe Izinkabi***

We are a nation that emphasizes and values “Ubuntu” “I am because you are” I am not an island but my existence depends on your existence” “I am my brother’s/sister’s keeper”.

Why have we allowed ourselves to behave worse than animals do?

Why do we suddenly see violence and killing each other as the only way to resolve disagreements?

Other nations are laughing at us and see how we have dug a deep grave for the future of our nation, South Africa especially black people. Who stands to benefit from the environment that we have created?

Lest remove “Izinkabi” and illegal guns in our communities and we call upon:

- Individuals, families and communities to reject violence as way of resolving disagreements and problems
- Let us also teach our kids and the youth that violence is not the only way to solve disagreements
- Individuals, Communities, Community leaders, including religious and traditional leaders should speak against the Hitman “Izinkabi” culture that has taken over in our communities
- Government should and must expeditiously spearhead stringent gun reform/control legislation that makes it illegal for people to carry guns in public, own one and implement law enforcement projects with the army to remove illegal firearms in our society. Only law enforcement officials should carry guns in public.
- Government to deliberately form intelligence crime fighting projects and teams to eradicate the Hitman “Izinkabi” culture in our communities

“We can do better South Africa, we can leave in peace and harmony with each other”

“Masikhiphe Inzodo nokungabekezelani emiphakathini yethu”

“An eye for an eye will destroy the South African society and make us blind to things that we should work together for”

“let us leave together as brothers and sisters or perish together like fools”
