

## **The South Africa We Want**

### ***#“Let Us Ensure A Future for Our Children & Generations to come”***

Politicians and political parties have given themselves the right to determine our future. It time as citizens that we take back our power, dictate and give direction on the “South African We Want and the South Africa We Deserve”. Let us not be dictated to by politicians and political parties on the type of country we should have. 2024 is a year for provincial and national elections and let us be active and tell political parties of the “South Africa we want “ that they should deliver to us. This should include what we want in relation to:

- The economy and job creation
- Morality (in all spheres of our society)
- Human rights and human dignity (inclusive of a better life for communities in townships and rural areas)
- Eradication of Corruption
- Service delivery
- Constituency based representation accountability by elected political representatives (not wait for electoral reform legislation)
- Education (at all levels)
- Security and crime fighting (including eradication of drugs, hitman (izinkabi) culture, violent and petty crimes)
- Etc

Through social media and other platforms in communities, let us individually and collectively articulate and identify qualities of the “South Africa we want and we deserve”. We should start now and not wait for when electioneering starts. Only political parties that provide clear, practical and time based plans to deliver the “The South Africa we want and deserve” should deserve our votes. Play your part and let your voice be heard. We need all South Africans to participate in this initiative.

“we shall not be victims of circumstances”

“We will take back our power to determine our own future”

“we are not incapable but capable”

“We will be our bother’s and sister’s keepers”
